Some people say that we should not eat meat, do you agree?

Have you noticed a bit of a hoo ha going on recently in the media regarding meat, at least in Serbia. Some people saying eat as much meat as you like, some people saying that no one should eat meat.

I do not agree, because if the human population didn't eat meat, we would all be skinny and weak. Eating meat is a very important thing in our lives. Sure there are people who are vegetarians but that is because their digestive system is more adaptive to vegetables. Eating meat gives us the ability to be fit, have a healthier lifestyle and so on. In addition, it has a good amount of proteins in it. There are a lot of famous companies that produce fast food whose main ingredient is meat.

If I could have it my way, I'd have a balanced mix of meat, with some meat-free meals too! But for Christmas, pork is my favorite! Ham, pork knuckles, roast pork.

But I only eat chicken the most because our cook (actually, Her Majesty my mother :p) dislikes all other kinds of meat. Hmpffff. :(

It is my opinion only and shouldn't be used as the basis of making any decisions about whether or not to eat meat.
