

B2

Some people say that we should not eat meat, do you agree?

Many people say that we should not eat meat and it has become a topic that has been more and more talked about.

In my opinion, the main reason that people should eat meat is because it gives us the amount of energy that we need and supplies us with protein which is very important for children and teens who are growing. It is also tasteful and keeps us full for a longer time than vegetables.

On the other hand, some people say that it is a crime to kill animals and eat them. But when we really think about it there are a lot of people who will continue eating meat and you becoming a vegan or vegetarian is not going to change anything. It will just become another problem that you have to think about and deal with daily.

This will completely change your life. Your social life will be changed because you won't eat, anymore, at the same places where your friends eat. You will waste a lot of time on shopping and finding replacements for meat, which is difficult in Serbia.

To sum up, I think eating meat is good for you and you should not change anything about it.
