Serbia's healthy food

Hello, boys and girls. I'm Bosko and welcome to my composition. I'm writing about Serbia's healthy food.

There are a lot of fruits and vegetables, that are full of vitamins. But there are also some enemies of healthy food. Those are hamburgers, fried chips, and other unhealthy food. For example, healthy food is lettuce. It's very healthy, it gives you strength and it's delicious. On the other side, unhealthy food is a hamburger. It is delicious, but it's not healthy at all. It doesn't have any vitamins and it doesn't give you strength.

At the end you must eat healthy food. Don't go to McDonald's and DO eat healthy food!
