

A2

It is very hard to find healthy food in Serbia. I don't know why. Actually people in Serbia often don't eat healthy food. We like food like hamburgers, pizza, coke, hot-dogs and things like that. I eat that too but not very often.

I like unhealthy food but my mother tells me to eat fruit and vegetables and not junk food. It is difficult to eat always good especially when I am at school with my friends because they are eating bad food but sometimes if we buy something in a health shop we all like it.
