The Fortune-teller

The fortune-teller looked at the crystal ball and said: "Something good will happen to you". At first I wasn't too convinced about this, but seeing that I do believe in this kind of things, the excitement started to grow inside me.

The first thing that came to my mind was winning lots of money. All kinds of things were on my mind but that soon became a disappointment, because the time passed by and nothing has happened. That was until my teacher told me that I got an A on a school project.

I guess that that was the good thing, but it could have been better.
