The Best Images of Serbia

Introduction

Serbia is a very beautiful country in many aspects, but not everyone knows that. The purpose of this report is to make you aware of many advantages of Serbia.

Nature

Serbian nature is just outstanding. There are five national parks with many extinct species of both plants and animals, waterfalls, forests and other rare things only nature can make. Let's not forget the rivers, lakes and high mountains which are amazing for winter sports and recreation.

Food

Serbian food is so good that every single person who has tried it is left speechless. It may be because it is very domestic, tasty and rather unusual.

People and Historical Monuments

All of this would be unimportant without the generous and kind people who will make you feel at home. Additionally, there are plenty of historical monuments, such as monasteries, Roman and Ottoman heritage. As far as the night life is concerned, there are many clubs which are the best in Europe.

Conclusion

Even if you think something bad about Serbia, or you have never even heard about it, it is a truly beautiful and historically rich country, which you should definitely have on your travel list.
