

## One thing I cannot live without

One thing I cannot live without is my drone. It was my birthday three days ago and I got a lot of presents. The best present was my drone.

My drone is small and it's black and orange. It can fly front, back, left and right. When I go out with my friends I take it and we all run and play thieves and detectives.

My grandma lives in the countryside. When I go to see her, I fly my drone and I film those beautiful mountains, rivers, plants and animals.

My father is going to buy me a bigger drone and I'm so happy about it.
