

A2 ONE THING I CANNOT LIVE WITHOUT Vuk Pejovic

One thing I cannot live without is Basketball!

Here is the story: I've started playing basketball at age of 7. I went to my first team practise and immediately liked it. I was getting better and better with it. Then my coach noticed my progress and invited me to better group. That motivated me much more to get better and train even harder. Now, after 4 years I can say I am really good at it and I still (surprisingly) have motivation and it's not boring to me at all! I think I will always love basketball and my big dream is to be a professional player one day
