Free time activities

Everyone loves music. I can't imagine life without music. Music makes me happy. Not everyone is talented for music, but I feel that no one can live without it. There are also a lot of stiles of music like pop, rap or rock, country and folk.

In free time we listen pop and rap. Most of songs we listen are from American singers, like Ariana Grande, Selena Gomez and Shawn Mendes.

We all love sports. Someone loves football, volleyball, handball or basketball. But our favourite sport is volleyball. We train volleyball and it makes us happy. The volleyball helps us to be free from stess. We train with our friends and we go together on volleyball camp in Svilajnac.

In the same time we play volleyball and play with our friends, we meet new people, and we have fun.

In our free time we like to go to cinema or escape rooms. Both of them are fun and interesting. There are lots of genres such as horrors, comedies or actions and love movies, but we usually watch comedies.

In escape rooms we have fun. Sometimes it's scarry but we know that we have friends around us and that helps us a lot. We have to think and find the way to escape. After that we go to Mc Donalds and celebrate.
