

I love summer

Marija Tomović

For me the summer starts with the ringing of the last school bell that day. It means that I'm done with learning and homeworks for some time. So basically summer means freedom to me, although I work every summer at "TRC Momčilo Čeković Koštunići" I really like that job because I get paid for it and I always meet some new people. I also love summer because it is hot and sunny and people are happier and in a good mood. Summer is my favourite season because it makes me happy and it connects me with my friends.
