

Do you agree that students should wear uniforms?

Nowadays, one of the main issues in our school system is inappropriate student's clothing. Some girls come to school in short skirts, high heels and wearing too much make-up. Boys wear short pants, which teachers consider impolite. First solution is initiation of wearing school uniforms. That change has both good and bad sides.

Firstly, most of students think that uniforms are unattractive and not fashionable. They also refuse to wear the same clothes like everyone else. Secondly, uniforms can be very uncomfortable and impractical too. It can be very demanding to keep them clean and undamaged.

However, there are a lot of advantages. For example, uniforms would eliminate differences between more and less fortunate students. We wouldn't know who has more expensive clothes, so there wouldn't be discrimination. Also, students would stop getting punished for inappropriate clothing because they would always wear uniforms. That could have good influence on relationship between students and teachers.

All in all, I think that school uniforms can be a very good change in our school system and I strongly recommend them because they would help overcome status differences and improve school atmosphere.
