

My favourite video game

Since I was little, I have played video games. I can't say I liked them all, some of them were quite boring, but some of them I liked so much, I couldn't wait to get home from school to play them.

My favourite video game is Stumble Guys. It is very exciting. You have various obstacles to overcome in order to win the crown, and various characters you get by winning the crown. It is fun because you can play it with your friends by typing the same code.

I love it very much, and will never stop playing it.
